Experience

Applab.mx Sep 2021 – Jan 2022 (4 months)

Front End Web Developer (Remote)

I worked on websites for businesses and clients looking for a more customized design. I also worked on a project in production for a German company called Bits&Birds in which we developed a large platform for the management of vacancies and candidates, working continuously hand in hand with the development team of that company.

Freelance 2020 – 2021

Brand designer, UI designer & Web Development

Independent professional focused on development services of web systems, brand design, interface design (UI / UX).

Async Agencia Creativa 2019 – 2022

CoFounder, Designer & Web Developer

Async is an agency dedicated to impulse companies and entrepreneurs into the digital world through branding, marketing and websites.

Relapp 2019 (6 months)

Brand Designer, UI Designer & App Developer (Flutter)

App sudcalifornian to search all kind of local business and promos in your town. We developed this app with Flutter using Firebase for backend, and we deployed on Google Play Store and App Store.

JastMedia 2018 (2 months)

Front End Developer, Content Loader

Juniper Data Center's Extending Department Focused on Websites Development for clients in United States.

Education

Bachelor in Computing Systems 2013–2018

Tecnológico Nacional de México Campus La Paz

Security and Web Development speciality
